

**Revised Syllabus (2013)**

For

**Vocational Course**

In

**SEED TECHNOLOGY**

At

**FYBSc level**

Submitted to

**University of Pune, Pune-7**

By

**Padmashri Vikhe Patil College of Arts, Science and Commerce,  
Pravaranagar- 413 713  
At/P. Loni, Tal. Rahata, Dist. Ahmednagar**

**2013**

**University of Pune**  
**INFORMATION ABOUT THE VOCATIONAL COURSE**  
**B.Sc. Seed Technology (Vocational)**

First year	1 <sup>st</sup> Term	2 <sup>nd</sup> Term
Paper – I (ST-1.1)	Morphology	Plant Breeding and Testing for Cultivar Genuineness
Paper – II (ST-1.2)	Seed Physiology	Seed Production
Paper-III (Practical) (ST-1.3)	Based on papers I & II.	
<b>Second year</b>		
<b>Semester 1<sup>st</sup></b>		
Paper – I (ST-2.1)	Hybrid Seed Production	
Paper – II (ST-2.2)	Seed Testing	
<b>Semester 2<sup>nd</sup></b>		
Paper – III (ST-2.3)	Vegetable Seed Production	
Paper – IV (ST-2.4)	Seed Quality Control	
Paper-VI (Practical) (ST-2.5)	Based on papers I, II, III & IV	
<b>Third year</b>		
<b>Semester 1<sup>st</sup></b>		
Paper – I (ST-3.1)	Seed Pathology and Entomology	
Paper – II (ST-3.2)	Seed Farm Management, Processing and Storage	
<b>Semester 2<sup>nd</sup></b>		
Paper – III (ST-3.3)	Entrepreneurship Development or Equivalent	
Paper – IV (ST-3.4)	Biotechnology and Intellectual Property Rights	
Paper-VI (Practical) (ST-3.5)	Based on papers I, II, III & IV	

  
 S. Deskar  
 BOS chairman, Vocational Subjects

### Work load Distribution

Term-I	: 36 lectures
Term-II	: 36 lectures
Total	: 72 lectures (Three lectures per week for Paper-I and Paper-II each)

### Annual Exam Pattern

#### Theory

Internal Exam	: 20 Marks
Theory Exam	: 80 marks
Total	: 100 Marks examination
Duration	: 3 hours for theory and 40 minutes for internal exam

#### Practical

Internal Exam	: 20 Marks
Practical Exam	: 80 marks
Total	: 100 Marks examination
Duration	: 4 hours

### Question Pattern for Internal Exam

Que.1) Choose the correct answer	1 x 5= 5 M
Que.2) State true or false	1 x 5= 5 M
Que.3) Define the following	1 x 5= 5 M
Que.4) Answer in two lines each	1 x 5= 5 M

### Question Pattern for Theory Exam

Que.1) Answer in two lines (any eight)	2 x 8=16 M
Que.2) Answer any four of the following	4 x 4=16 M
Que.3) Write notes on any four of the following	4 x 4=16 M
Que.4) Answer any two of the following	8 x 2=16 M
Que.5) Answer any one of the following	1 x 16=16 M

### Question Pattern for Practical Exam

• Oral, Journal, Submission, Visit Report	20 M
• As per the skeleton question paper	80 M

**Term I: Morphology**

<b>Chapter-1: Flower</b>	<b>4L</b>
<ul style="list-style-type: none"><li>• Definition</li><li>• Detail study of flowers of the following crops:<ol style="list-style-type: none"><li>i. Wheat</li><li>ii. Sorghum</li><li>iii. Groundnut</li><li>iv. Okra</li></ol></li></ul>	
<b>Chapter-2: Study of Families</b>	<b>6L</b>
<ul style="list-style-type: none"><li>• Dicotyledonous<ol style="list-style-type: none"><li>i. Malvaceae (<i>Gossypium arboreum</i>)</li><li>ii. Fabaceae (<i>Glycine max / Cajanus cajan</i>)</li><li>iii. Solanaceae (<i>Solanum melongena / Lycopersicum esculentum</i>)</li><li>iv. Asteraceae (<i>Helianthus annuus</i>)</li></ol></li><li>• Monocotyledonous<ol style="list-style-type: none"><li>i. Liliaceae (<i>Allium cepa</i>)</li><li>ii. Poaceae (<i>Zea mays / Pennisetum typhoides</i>)</li></ol></li></ul>	
<b>Chapter-3: Microsporangium</b>	<b>2L</b>
<ul style="list-style-type: none"><li>• Definition</li><li>• Structure (T.S of typical anther)</li><li>• Development of microspore</li><li>• Development of male gametophyte</li></ul>	
<b>Chapter-4: Megasporangium</b>	<b>2L</b>
<ul style="list-style-type: none"><li>• Definition</li><li>• Structure (L.S of Ovule) and types of ovules</li><li>• Development of megaspore</li><li>• Development of female gametophyte</li></ul>	
<b>Chapter-5: Reproduction</b>	<b>4L</b>
<ul style="list-style-type: none"><li>• Definition</li><li>• Vegetative (Natural and Artificial) propagation</li><li>• Sexual reproduction</li></ul>	
<b>Chapter-6: Pollination</b>	<b>4L</b>
<ul style="list-style-type: none"><li>• Definition</li><li>• Types of pollination (Autogamy and Allogamy)</li><li>• Contrivances in self and cross pollination</li><li>• Agencies of allogamy</li><li>• Advantages and Disadvantages of both self and cross pollination</li></ul>	

<b>Chapter-7: Fertilization</b>	<b>4L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Process of Fertilization in angiosperms</li> </ul>	
<b>Chapter-8: Endosperm and Embryo Development</b>	<b>4L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Types of endosperm</li> <li>• Functions of endosperm</li> <li>• Development of dicot embryo</li> <li>• Development of monocot embryo</li> </ul>	
<b>Chapter-9: Seed</b>	<b>3L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Difference between seed and grain</li> <li>• Concept of seed quality <ul style="list-style-type: none"> <li>i. Inner core</li> <li>ii. Middle core</li> <li>iii. Outer core</li> </ul> </li> </ul>	
<b>Chapter-10: Fruit</b>	<b>3L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Classification of fruits</li> <li>• Detail study of following fruits <ul style="list-style-type: none"> <li>i. Cypsella-Sunflower</li> <li>ii. Caryopsis-Maize</li> <li>iii. Legume-Tur</li> <li>iv. Capsule-Okra</li> <li>v. Berry-Tomato</li> <li>vi. Pepo-Cucumber</li> <li>vii. Cremocarp-Coriander</li> </ul> </li> </ul>	

**Term-II: Plant Breeding and Testing for Cultivar Genuineness**

<b>Chapter-11: General Introduction to Plant Breeding</b>	<b>3L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Scope</li> <li>• Objectives</li> </ul>	
<b>Chapter-12: Activities in Plant Breeding</b>	<b>3L</b>
<ul style="list-style-type: none"> <li>• Creation of variation</li> <li>• Selection</li> <li>• Evaluation</li> <li>• Multiplication</li> <li>• Distribution</li> </ul>	

<b>Chapter-13: Plant Introduction</b>	<b>3L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Types (Primary and Secondary)</li> <li>• Procedure</li> <li>• Merits and Demerits</li> <li>• Important achievements</li> </ul>	
<b>Chapter-14: Pure Line Selection</b>	<b>3L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Characters of pure line</li> <li>• General scheme for pure line selection</li> <li>• Advantages and Disadvantages of pure line selection</li> <li>• Achievements</li> </ul>	
<b>Chapter-15: Mass Selection</b>	<b>4L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Procedure for mass selection</li> <li>• Advantages and Disadvantages of mass selection</li> <li>• Achievements</li> </ul>	
<b>Chapter-16: Clonal Selection</b>	<b>4L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Characters of clone</li> <li>• Procedure for clonal selection</li> <li>• Advantages and Disadvantages of clonal selection</li> <li>• Achievements</li> </ul>	
<b>Chapter-17: Hybridization</b>	<b>5L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Objectives</li> <li>• Types: Intervarietal and Distant hybridization</li> <li>• Procedure</li> <li>• Difficulties in hybridization</li> <li>• Consequences</li> </ul>	
<b>Chapter-18: Mutation for crop improvement</b>	<b>3L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Mutagens (Physical and Chemical), Mutants</li> <li>• Types of mutation (Point, Chromosomal, Spontaneous and Induced)</li> <li>• Application of mutation breeding</li> <li>• Limitations of mutation breeding</li> <li>• Achievements</li> </ul>	
<b>Chapter-19: Advanced Techniques in Plant Breeding</b>	<b>2L</b>
<ul style="list-style-type: none"> <li>• Advanced Techniques</li> <li>• Definition of Tissue, Embryo and Anther Culture</li> <li>• Applications of Tissue, Embryo and Anther Culture</li> <li>• Somaclonal variations</li> </ul>	

- Examination of Seeds
  - i. Morphological characters
  - ii. Chemical tests (Phenol colour and Peroxidase tests)
  - iii. Biochemical test (Electrophoresis)
- Examination of Seedling
- Grow Out Test

**SEED TECHNOLOGY**  
Paper-II: Seed Physiology and Seed Production

---

**Term I: Seed Physiology**

<b>Chapter- 1: Structure and Composition</b>	<b>5L</b>
<ul style="list-style-type: none"><li>• Introduction</li><li>• Seed structure (Embryo, Endosperm, Seed coat)</li><li>• Composition of seed storage constituents (Carbohydrates, Protein, Oil and fats)</li></ul>	
<b>Chapter-2: Physiology of Seed development</b>	<b>3L</b>
<b>Chapter-3: Seed Germination</b>	<b>7L</b>
<ul style="list-style-type: none"><li>• Introduction</li><li>• Definition</li><li>• Types of Germination<ul style="list-style-type: none"><li>i. Hypogeal germination</li><li>ii. Epigeal germination</li></ul></li><li>• Physiological and Biochemical changes during germination.</li><li>• Seedling abnormalities and its causes</li></ul>	
<b>Chapter-4: Seed Dormancy</b>	<b>6L</b>
<ul style="list-style-type: none"><li>• Introduction and Definition</li><li>• Types of Dormancy</li><li>• Factors affecting dormancy</li><li>• Methods of breaking dormancy</li></ul>	
<b>Chapter-5: Seed storage and longevity</b>	<b>6L</b>
<ul style="list-style-type: none"><li>• Introduction and Definition</li><li>• Physiology of seed storage</li><li>• Seed deterioration</li><li>• Short term and long term storage</li><li>• Storage condition</li><li>• Factors affecting seed longevity</li></ul>	
<b>Chapter-6: Seed Vigour and seed viability</b>	<b>6L</b>
<ul style="list-style-type: none"><li>• Introduction</li><li>• Importance of seed vigour</li><li>• Factors affecting seed vigour</li><li>• Seed ageing and deterioration</li><li>• Seed viability concept</li></ul>	
<b>Chapter-7: Seed pelleting and Artificial seed</b>	<b>3L</b>
<ul style="list-style-type: none"><li>• Process of pelleting</li><li>• Material</li><li>• Types of coating</li><li>• Advantages and precaution</li><li>• Production of Artificial seed (Synthetic seed)</li></ul>	

<b>Term II: Seed Production</b>	
<b>Chapter-8: General Introduction</b>	<b>2L</b>
<ul style="list-style-type: none"> <li>• Seed as basic input in Agriculture</li> <li>• Classes of seed <ul style="list-style-type: none"> <li>i. Nucleus</li> <li>ii. Breeders</li> <li>iii. Foundation</li> <li>iv. Certified</li> </ul> </li> </ul>	
<b>Chapter-9: Seed Production Organization in India</b>	<b>2L</b>
<ul style="list-style-type: none"> <li>• Introduction</li> <li>• National Seed Corporation (NSC) and its objectives</li> <li>• State Seed Corporation (SSC) and its objectives</li> </ul>	
<b>Chapter-10: Release of New Variety</b>	<b>6L</b>
<ul style="list-style-type: none"> <li>• Introduction</li> <li>• Evaluation <ul style="list-style-type: none"> <li>i. Station trial</li> <li>ii. Multi-location trial</li> <li>iii. Disease and insect tests</li> <li>iv. Quality tests</li> </ul> </li> <li>• Identification of entries for release</li> <li>• Release of a variety</li> <li>• Multiplication</li> </ul>	
<b>Chapter-11: Seed Production Methodology</b>	<b>6L</b>
<ul style="list-style-type: none"> <li>• Location and Season</li> <li>• Land requirement</li> <li>• Cultural practices</li> <li>• Isolation</li> <li>• Plant protection</li> <li>• Weed control</li> <li>• Roguing</li> <li>• Special operation</li> <li>• Harvesting</li> <li>• Threshing</li> <li>• Processing</li> </ul>	
<b>Chapter-12: Sowing</b>	<b>4L</b>
<ul style="list-style-type: none"> <li>• Definition</li> <li>• Time of sowing</li> <li>• Calculation for seed rate</li> <li>• Methods of sowing</li> </ul>	
<b>Chapter-13: Land Preparation</b>	<b>4L</b>
<ul style="list-style-type: none"> <li>• Definition.</li> <li>• Steps in land preparation for different crops (Cotton, Bajra, Wheat, Chilli and Cauliflower)</li> <li>• Types of nursery beds</li> </ul>	

#### Chapter-14: Irrigation and Drainage

5L

- Definition
- Methods of irrigation
- Sources of irrigation
- Controlling water loss
- Quality of irrigation water
- Losses due to excessive irrigation
- Importance of drainage

#### Chapter-15: Genetic Purity and its maintenance

4L

- Definition
- Steps for maintenance of genetic purity
  - i. Checking seed source
  - ii. Isolation distance
  - iii. Roguing
  - iv. Precaution during crossing program
  - v. Care during harvesting and threshing

#### Chapter-16: Introduction to Crop Diseases

3L

- Definition
- Types-Biotic and Abiotic
- Tikka (Ground nut)
- Smut (Jowar)
- Rust (Wheat)
- Early blight (Tomato)

FYBSc Vocational  
SEED TECHNOLOGY

Paper-III: Practical based on Paper-I and Paper-II

Term-I

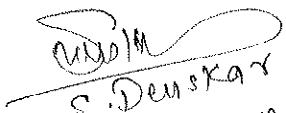

- |  |    |
|--|----|
| 1. Study of seed production practices in relation to sowing, roughing, irrigation in cotton/bajra/sorghum/tomato/brinjal | 2P |
| 2. Study of Families   | 2P |
| • Dicotyledonous   |    |
| i. Malvaceae ( <i>Gossypium arboreum</i> )   |    |
| ii. Fabaceae ( <i>Glycine max / Cajanus cajan</i> )  |    |
| iii. Solanaceae ( <i>Solanum melongena / Lycopersicum esculentum</i> )   |    |
| iv. Asteraceae ( <i>Helianthus annus</i> )   |    |
| • Monocotyledonous   |    |
| i. Liliaceae ( <i>Allium cepa</i> )  |    |
| ii. Poaceae ( <i>Zea mays</i> )  |    |
| 3. Study of vegetative propagation methods   | 1P |
| • Tubers   |    |
| • Runners  |    |
| • Bulbs  |    |
| • Corms  |    |
| • Suckers  |    |
| 4. Study of artificial vegetative propagation methods  | 1P |
| • Stem cutting   |    |
| • T-budding  |    |
| • Air layering   |    |
| • Stone grafting   |    |
| 5. Study of Crop Fruits  | 1P |
| • Cypsella-Sunflower   |    |
| • Caryopsis-Maize  |    |
| • Legume-Tur   |    |
| • Capsule-Okra   |    |
| • Berry-Tomato   |    |
| • Pepo-Cucumber  |    |
| • Cremocarp-Coriander  |    |
| 6. Study of dicot and monocot seeds with suitable examples (Morphology)  | 1P |
| 7. To study different types of seed germination (hypogeal and epigeal)   | 1P |
| 8. To identify type of dormancy and study different methods of breaking dormancy   | 1P |
| 9. To study quick viability test (TZ test) and Seed vigour testing by physical method                                    | 1P |

## Term-II

10. Preparation of nursery beds 2P
11. Grow Out Test 1P
12. Study of seed production practices in relation to weed control, harvesting and threshing in cotton/bajra/sorghum/tomato/brinjal 2P
13. Study of hybridization technique in cotton 1P
14. Identification of morphological and chlorophyll mutants in chick pea (demonstration) 1P
15. Study of varietal descriptors 1P
16. Varietal identification in wheat by using Phenol Colour Test 1P
17. Admixture testing in soybean seed by using Peroxidase test 1P
18. Demonstration of Electrophoresis 1P
19. Seed Industry/Plant Breeding Research Centre visit is compulsory for the students. They are supposed to write a visit/study report and submit it at the time of final practical examination. 1P
20. Students are supposed to submit seed samples (minimum 10) along with their botanical names, family, variety etc. to the department at the time of final practical examination. 1P
